

QAT XLR TIP

The TopTip is milled out of aircraft aluminium and is fully configurable by the user.

The benefits are:

- Comfortable break point. Used together with QuickLok, (un)mounting a microphone/windshield combination becomes "a snap".
- Compatible with any mike suspension or windshield.
- Greatly reduced handling noise compared to traditional setup due to very thin cable from XLR to mic.
- Mounting of plug-on transmitter at the boom tip. Rigid construction guarantees that the transmitter will not move around or knock against the boom Configurable for mono or stereo microphones.
- Easy repairs or re-configuration using standard Neutrik connectors. Thin flexible cable available from Ambient.
